The Man Behind PMS

Mr. Jyotivardhan Jaipuria
Founder & Managing Director

- Jyoti has an overall 38 years of experience in the Indian Capital Market including 21 years in DSP Merrill Lynch and 8 years in ICICI.
- He was Head of Research and strategist for India at Bank of America Merrill Lynch. He helped build the research team as the leading research provider in India as well as one of the top institutional brokers in the country.
- As a strategist, he was rated amongst the top strategists in India by leading institutional investors in India.
- Jyoti has also served as a member of the Board of Directors of DSP Merrill Lynch, the Asia Pacific Research Executive Committee and Operating Committee, the India Country Leadership Team (CLT) and other management committees.
- Jyoti graduated in Commerce (B.Com) from Sydenham College and has an MBA from the Indian Institute of Management, Ahmedabad.

Why Valentis?

- **Client centric approach**
 - Easy access to founders, fund manager and analyst team
- **Our skin is in the game**
 - The founders would invest in the same fund with you.
- **Our interests are aligned with yours**
 - Performance fees incentivizes superior performance
- **Flexible solutions**
 - We are happy to work with you to find customized solutions to your investment needs.
- **Strong pedigree and financial market experience**
 - The founder has over 30 years experience in the financial industry and has successfully carved a niche for research based, non-consensus views.

- ❑ **Market view**

#1: Research, research and more research drives our investment philosophy

- Detailed research wins over gut feels and market sentiment
- Process driven research to eliminate market noise – blend of science and art
 - Largely scientific process. This involves, screening to identify ideas and then detailed modelling to arrive at fair valuations.
 - Bit of art involved
 - We look at market sentiment and psychology
 - We try to stay away from the herd.

“Buy not on optimism, but on arithmetic.” —Benjamin Graham.

#2: What are we looking for?

➤ We seek large discrepancies in risk:reward

- Stocks trade like a bell curve with a large number of stocks trading at near fair risk:reward
- We focus on stocks at the extreme where returns can be disproportionately high for the risk we take.

➤ The 3 “U”s approach

1. Undervalued: risk-reward trade off should provide margin of safety
2. Under-owned: we prefer stocks that have low FII, institutional investor interest
3. Under-performing or Undiscovered: low expectations on the stock

We are looking for stocks with asymmetrical risk reward

#3: What stocks do we focus on?

➤ We focus on stocks at earnings “inflection point”

- We are looking at companies with high operating leverage.
- This will likely kick in due to higher utilization levels as demand improves.
- We buy stocks early before they are flavor of the market

➤ Stocks we like have following characteristics

- Large size of market and attractive industry dynamics
- Competitive advantage of the company vs competition
- Strong Corporate governance

"Even the intelligent investor is likely to need considerable willpower to keep from following the crowd." — Benjamin Graham

#4: Buy and hold for wealth creation

➤ We believe in buying under-valued stocks and holding them for long term partly like a Private Equity investor

- We buy unloved companies that are either out of favor or are undiscovered and unresearched.
- We are willing to do deep research on the industry dynamics and company positioning.
- We are passionate about being “dispassionate” in our analysis.

When do we sell stocks?

➤ When the stocks has rallied & is no longer cheap

- Will I buy the stock at current market price?

➤ When the reason for buying the stocks has not materialised

- e.g. now competition come in or size of market changes.

“The big money is not in the buying and the selling, but in the waiting” — Charlie Munger.

Valentis Rising Stars Opportunity Fund

Investment Objectives: The 3 Us

- The objective of the scheme is capital appreciation in the medium term to long term by investing in cherry picked stocks mostly in the Mid and Small cap space.
- The portfolio focuses primarily on a buy and hold strategy at most times.
- **We will focus on the 3 Us (Under-owned, under-valued and undiscovered stocks).**

Midcaps are under-owned by FIIs...

Market Cap	No. of Stocks	FII holding %
>50000 cr.	164	20.74
30000 - 50000 cr.	76	14.39
10000 - 30000 cr.	231	14.28
5000 - 10000 cr.	228	10.96
1000 - 5000 cr.	606	5.48
500 - 1000 cr.	271	2.84

ASHLEY COUTINHO
Mumbai, 14 January

Four out of every five portfolio management services (PMS) schemes beat the Nifty50 in calendar year 2021 (CY21) amid a sustained rally in mid- and small-cap firms.

Eighty per cent, or 200 of the 249 PMS schemes, beat the 24.1 per cent returns generated by the benchmark. Seventy schemes returned over 50 per cent during the year. The 249 schemes collectively delivered average returns of 40 per cent, higher than the 30.2 per cent delivered by the

benchmark Nifty 500, but lower than the Nifty Midcap 100 (46.1 per cent) and NSE Smallcap 100 (59.3 per cent).

Green Portfolio's Super 30 was the top performer with returns of 115.5 per cent, followed by Valentis Advisors' Rising Star Opportunity (96.4 per cent) and Right Horizons' Minerva India Under-Served (92.2 per cent).

"The most satisfying part for us was that we were able to generate significant outperformance by keeping beta way lower than the index. It means we took less risk and delivered more returns while maintaining liquidity," said

a note put out by Carnelian Asset Advisors, whose multi-cap Shift Strategy is among the top 10 PMS schemes, with one-year returns of over 79 per cent.

"We were in the minority while taking aggressive calls on the IT and manufacturing (China +1) theme way back in September 2020 and positioned our portfolio accordingly. This contributed very well to our performance this year," the note added.

Many PMS schemes lean towards mid- and small-caps in their portfolios and run concentrated portfolios of 15-20 stocks. Such portfolios increase the

potential of higher returns, but are also prone to steep falls during corrections.

Companies that have low leverage, strong fundamentals, and high corporate governance did not necessarily do too well last year, according to Siddhartha Rastogi, COO & head of sales, Ambit Asset Management. Rather, cyclical businesses with a high debt-to-equity ratio outperformed, he said.

"Most of the PMS schemes chase momentum instead of consistency and those that were heavy on cyclicals did well last year," Rastogi said.

According to experts, 2021 was

driven by re-rating due to easy liquidity and low interest rates. Both are likely to reverse, which is why this year is likely to be the year of de-rating and modest earnings growth. Interest rates are bound to increase and market volatility will be higher. This will put companies' earnings growth back into focus.

"Whenever such an environment is created, markets are volatile and alpha creation becomes difficult," Carnelian said.

"Last year, the earnings didn't increase so much, but PE multiples expanded. We are not going to see so much of that from here on. The PE multiples will decelerate and as the weighted average cost of capital rises, equities will give relatively lesser returns in 2022," said Rastogi.

According to him, investors should book profits in businesses that are cyclical and where PE multiples have expanded irrationally.

PMS schemes managed ₹22.7 trillion under the discretionary portfolio, ₹1.44 trillion under the non-discretionary portfolio, and ₹2.23 trillion under advisory, latest regulatory data showed.

The PMS segment invests money on behalf of well-off individuals. The minimum investment that regulations allow is ₹50 lakh.
